

Various Weave Patterns of Rovcloth®

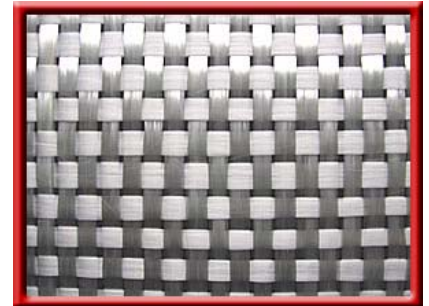

Plain Weave

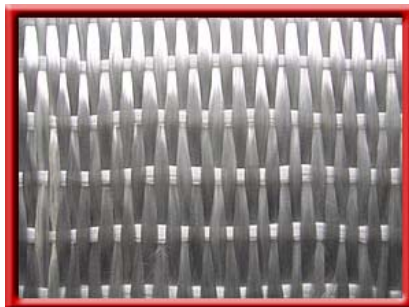

Rovcloth® woven roving can be produced in many variations. To the left is a standard **Plain Weave** (FGI's 1055) which alternates the Warp (0°) rovings 1 up, 1 down.

Basket Weave

To the right is a standard **Basket Weave** (FGI's 1854) which alternates the Warp (0°) rovings 2 up, 2 down. The Warp looks like 1 single strand but is really comprised of 2.

Warp-Uni Plain Weave

To the left is a custom **Plain Weave** (FGI's 27 oz. Warp-Uni) which has over 90% of the total product weight in the Warp (0°) rovings.

Twill Weave

To the right is a custom **Twill Weave** (FGI's 2977) which alternates the Warp (0°) rovings 1 up, 3 down. This particular weave gives the Warp a distinctive diagonal appearance.
